DETAILED ACTION

Drawings

1. The drawings are objected to because:

The various descriptions on the drawings are not permitted. Applicant is required to provide numerals in place of the descriptions and describe these numerals in details in the specification.

2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant’s use.

Art Unit: 3727

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The specification is objected to:

The specification is not in compliance with the format. Note the format of the cited references.

The specification must include details description of the various elements shown in the drawings.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claims are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Each claim must be in one sentence form only. Note the format of the claims in the patents cited.

Regarding claims 2-12, each of the claims must recite the claimed subject matter in the parent claim.

Claim Rejections - 35 USC § 102/103

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for some rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for some obviousness rejections set forth in this Office action:

Art Unit: 3727

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4, and 6-12 are rejected under 35 U.S.C. 102 (e) as being anticipated by Hassett (D481865). Hassett teaches a pouch for containing a portable Compact Disc Player as claimed.

Regarding claim 2, note the see through plastic portion in Fig. 2. With respect to the case being waterproof. It is noted that the case in Hassett is as much as waterproof as the claimed case. There is no structure distinguishing the case being waterproof as claimed and the case taught by Hassett.

Regarding claim 3, note the orifice for the headphone in Fig. 4.

Regarding claim 4, note the zipper open the case in Fig. 1.

8. Claims 1-4, and 6-12 are rejected under 35 U.S.C. 102 (e) as being anticipated by Walter (US 2003/0040286). Walter teaches a pouch that can contain a portable Compact Disc Player as claimed.

Regarding claim 2, note the see through plastic portion in Fig. 2

Regarding claim 3, note the orifice that can accommodate headphone 22.

Regarding claim 4, note the zipper 30.

9. Claim 1, 3, 4, and 6-12 are rejected under 35 U.S.C. 102 (b) as being anticipated by Moor (6006915). Moor teaches a pouch that can contain a portable Compact Disc Player as claimed.

10. Claim 5 is rejected under 35 U.S.C. 103 (a) as being unpatentable over anyone of Hassett or Walter or Moore, as set forth above, in view of Stava (5584424). It would have been obvious

Art Unit: 3727

for one of ordinary skill in the art to provide the belt clip in as taught by Stava to provide an alternative device for attaching the case to the belt.

11. Claims 1-4, and 6-12 are rejected under 35 U.S.C. 102 (b) as being anticipated by Hillman (D428700). Hillman teaches a pouch that can contain a portable Compact Disc Player as claimed.

Regarding claim 2, note the transparent wall in Fig. 1.

Regarding claim 3, note the opening on the bottom of the case as shown in Fig. 4.

12. Claims 1-4, and 6-12 are rejected under 35 U.S.C. 102 (b) as being anticipated by Elliot (6345751). Elliot teaches a pouch that can contain a portable Compact Disc Player as claimed with opening 205 and transparent wall 116.

13. Claim 5 is rejected under 35 U.S.C. 103 (a) as being unpatentable over Hillman '700 or Elliot in view of Stava (5584424). It would have been obvious for one of ordinary skill in the art to provide the belt clip in Hassert as taught by Stava to provide an alternative device for attaching the case to the belt.

14. Claims 1, 4, and 5-12 are rejected under 35 U.S.C. 102 (b) as being anticipated by Stava. Stava teaches a pouch that can contain a compact Disc player as claimed.
